

How to Install Microsoft Power BI Desktop

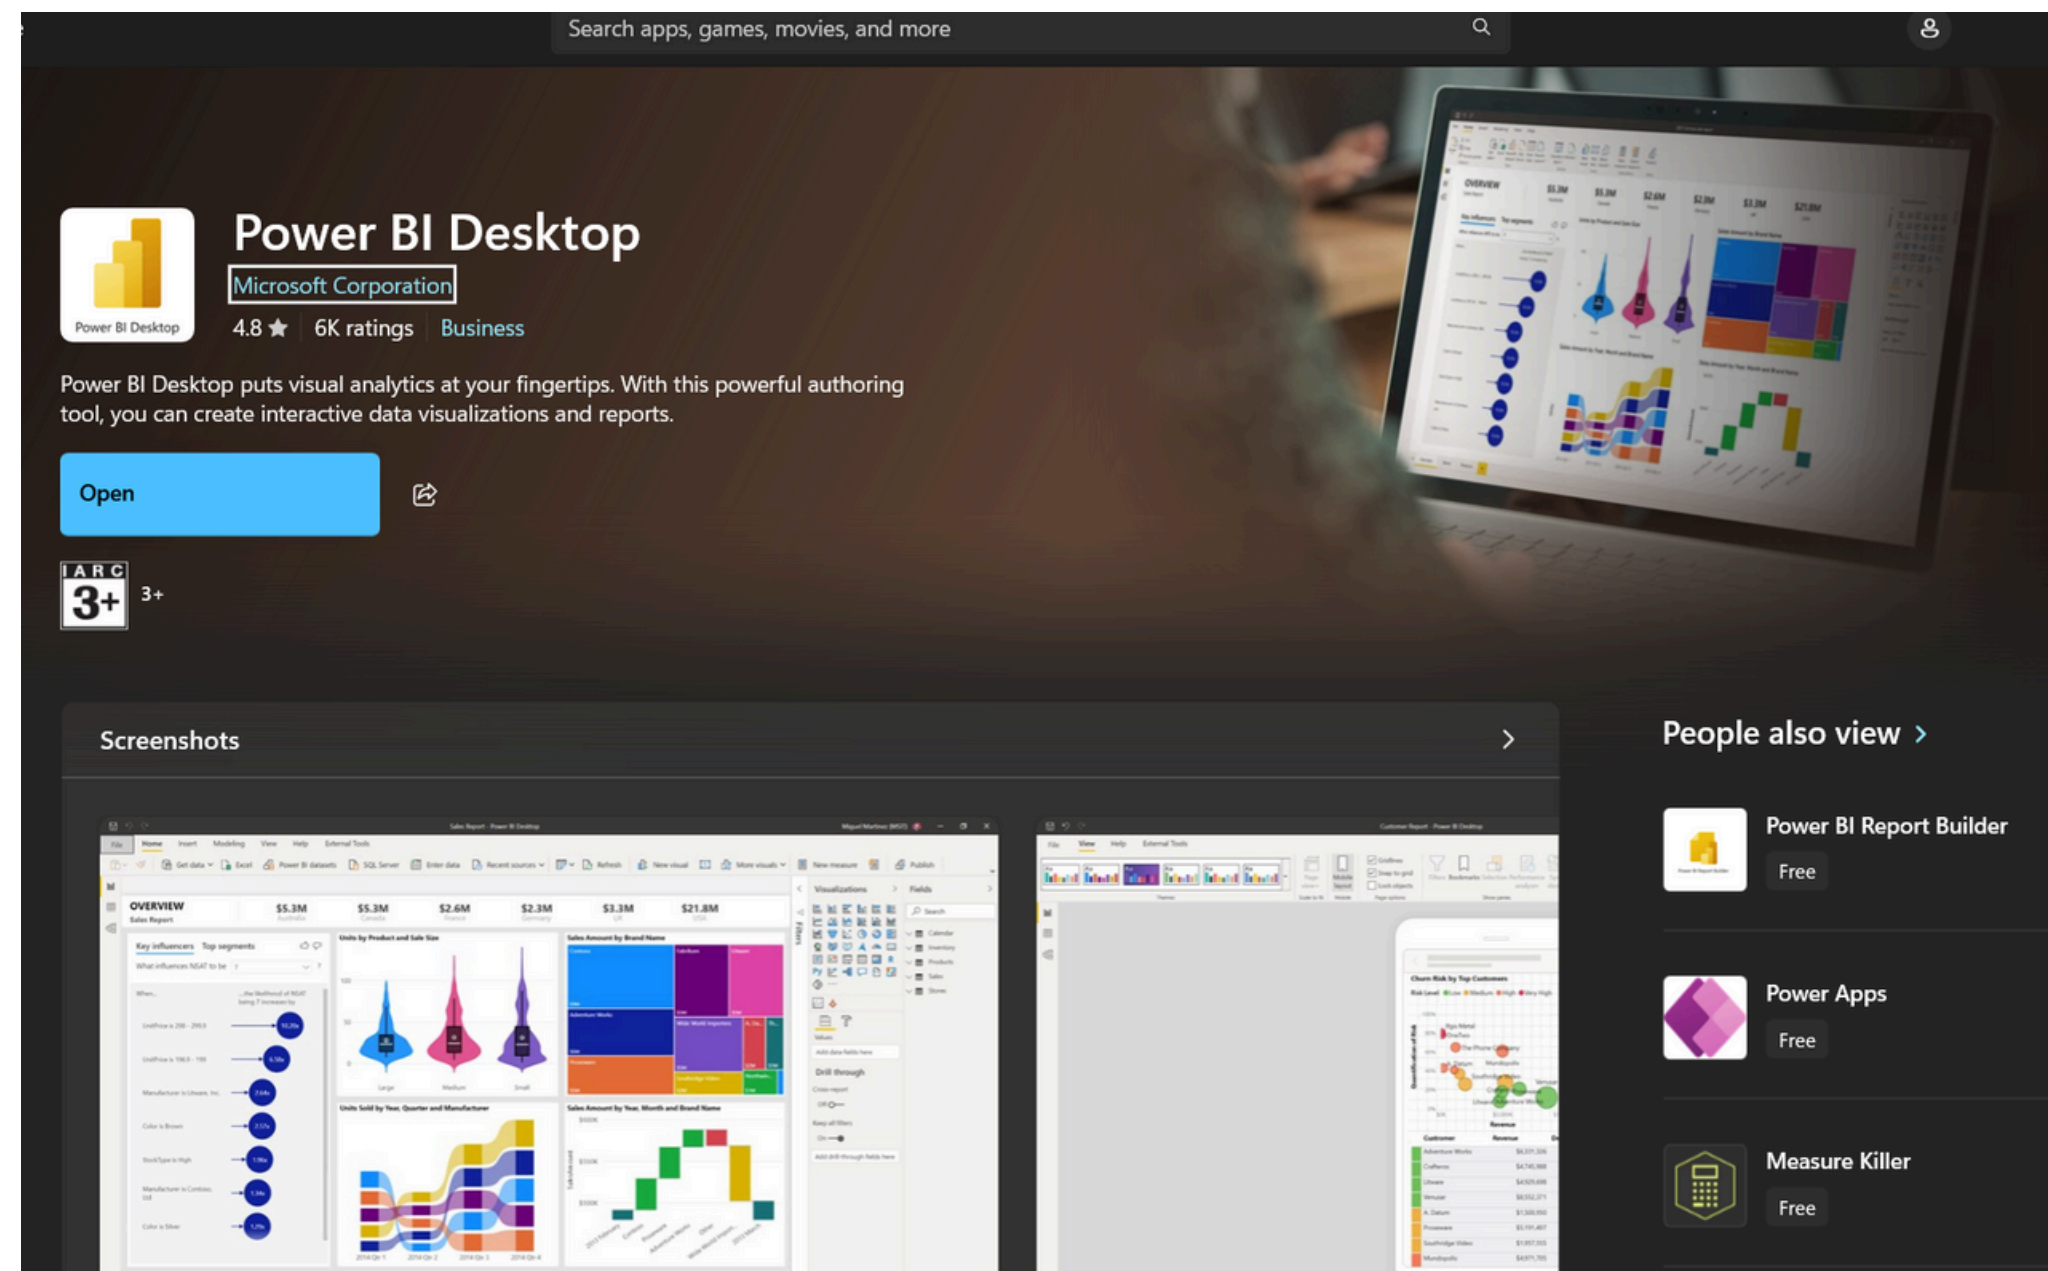

Step 1: Open Microsoft Store

- Click the Start Menu (Windows icon).
- Search for “Microsoft Store”.
- Click to open the app.

Step 2: Search for Power BI

- In the Microsoft Store search bar, type “Power BI Desktop”.
- Select the app named “Microsoft Power BI Desktop”.

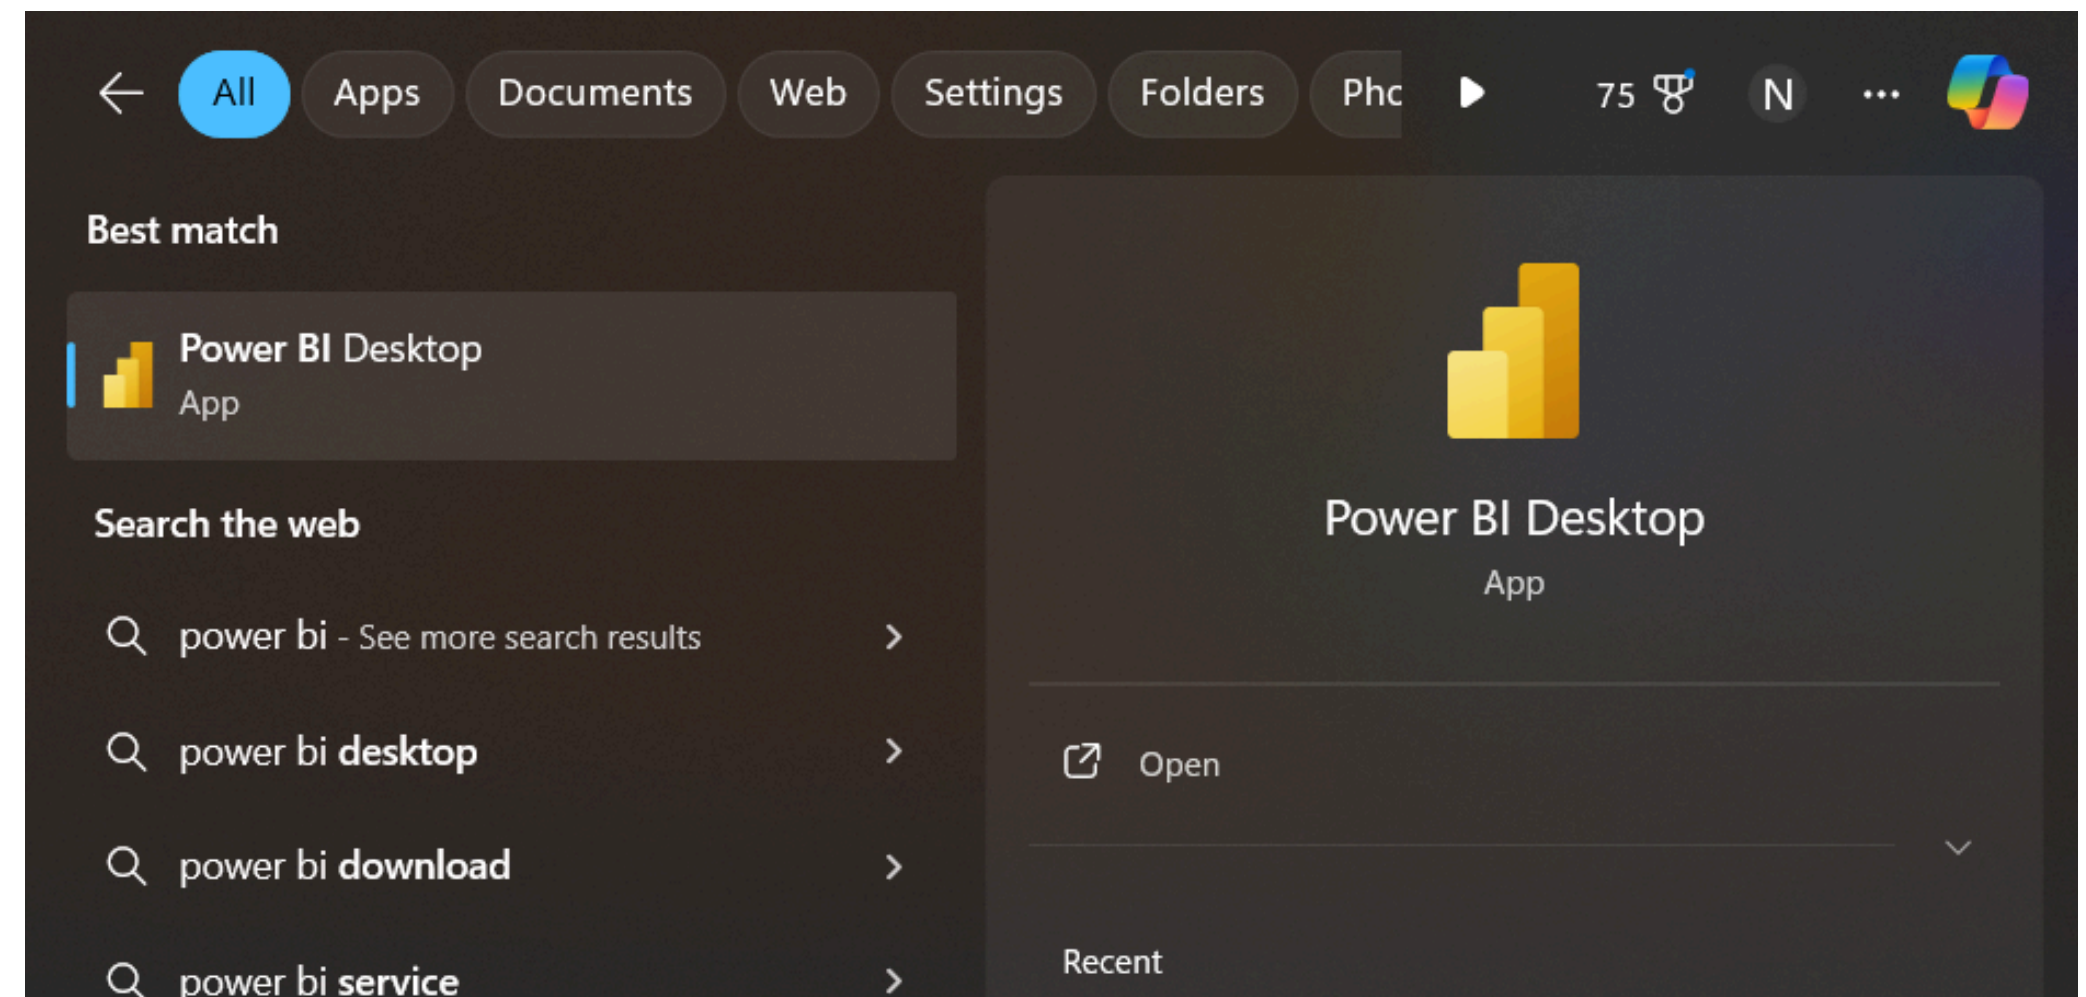

Step 3: Install Power BI Desktop

- Click the “Get” or “Install” button.
- Wait for the download and installation to complete.

Step 4: Open Power BI Desktop

- Once installed, click “Open” in the store, or
- Go to Start Menu > Search “Power BI Desktop” > Click to open.

Power BI is Ready to Use!

You're All Set!

- Power BI Desktop is now ready.
- Start creating reports and dashboards.
- Optional: Sign in with a Microsoft account to publish reports online.

Need Help?

Troubleshooting & Alternatives

- If Microsoft Store doesn't work:
- 🖱️ Download from:
powerbi.microsoft.com/desktop
- For 32-bit vs 64-bit systems:
- 🖱️ Right-click This PC > Properties > Check system type
